JAPANESE DESIGN

The key to the Japanese interior design concept is known as "Ma". This concept aims at a balance between the available space that can be used on one side, and furniture and other objects, on the other side.

Ma is used to keep spaces clear and uncluttered, to help create a special and calm home for both the inhabitants and visitors, main principles of Japanese interiors.

TYPE OF LAMINATES

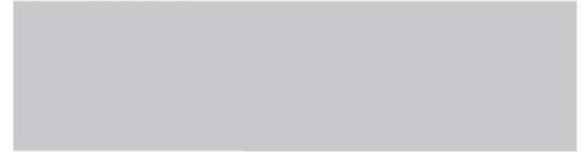

Defined by several factors. The style give us clean lines, gentle organic curves, a passion for different materials and designers that are idolized to this days. This style is from mid-1930s to mid-1960s, he survived events like wars uproot and destruction.
