- (O) Inner Drawer System

SLIM BOX SERIES

Soft Close is a mechanism, which slows the close of a drawer as it is closed. The drawer is pushed back normally, when it reaches the last 25 mm of closure the soft close mechanism will act, and the door will slow immediately and then close gradually and silently. We launched three new soft close drawer systems to our Premium range from 2017. The first will be the Slim Box 88mm soft close drawer system which carries 30kg. It has standard Drawer with 90mm height, will install at top layer for base unit cabinet.
